## How can we differentiate lessons for our Multilingual Learners?

As teachers, we plan our classes based on the required standards and the student's needs. But *how will we differentiate these standards for our multilingual learners, taking into account students' different backgrounds and second language fluency levels?* It may be hard when teachers have so much on their plates, but in Halifax County Schools, teachers care about our students. They always go above and beyond.

Teachers can differentiate lessons using the WIDA English Language Development Standards for our multilingual Learners.

[Here](#) I leave the link to explore and check when differentiating and scaffolding your lessons for our MLs.
