

Dear AFM Teacher:

Congratulations on your Advanced Functions and Modeling Math 4 course assignment. Advanced Functions and Modeling provides students an in-depth study of modeling and applying functions. Home, work, recreation, consumer issues, public policy, and scientific investigations are just a few of the areas from which applications should originate. Appropriate technology, from manipulatives to calculators and application software, should be used regularly for instruction and assessment. Define and use linear, quadratic, cubic, and exponential functions to model and solve problems. Use systems of two or more equations or inequalities to solve problems. Use the trigonometric ratios to model and solve problems. Use logic and deductive reasoning to draw conclusions and solve problems.

Prerequisites:

- Describe phenomena as functions graphically, algebraically and verbally; identify independent and dependent quantities, domain, and range, and input/out.
- Translate among graphic, algebraic, numeric, tabular, and verbal representations of relations.
- Define and use linear, quadratic, cubic, and exponential functions to model and solve problems.
- Use systems of two or more equations or inequalities to solve problems.
- Use the trigonometric ratios to model and solve problems.
- Use logic and deductive reasoning to draw conclusions and solve problems.

Advanced Functions and Modeling

(Reviewed August 23, 2019)

Advanced Functions and Modeling provides students an in-depth study of modeling and applying functions. Home, work, recreation, consumer issues, public policy, and scientific investigations are just a few of the areas from which applications should originate. Appropriate technology, from manipulatives to graphing calculators and application software, should be used regularly for instruction and assessment.

First 4½ weeks	Second 4½ weeks	Third 4½ weeks	Fourth 4½ weeks
Unit 1 Logarithmic Functions to Model & Solve Problems	Unit 4 Bivariate Data: Linear, Polynomial, Exponential, Trigonometric, Power, & Logarithmic Functions	1.02 e (cont.)	Unit 7 (Cont.) 2.05 c Determine if a Series Converges or Diverge
2.01 a Using Tables, Graphs, & Algebraic Properties	1.01 a Interpret the Constants, Coefficients, and Bases	1.02 f (cont.)	2.05 d Recursive & Explicit Representations
2.01 b Interpret the Constants, Coefficients, and Bases	1.01 b Check Models for Goodness-of-fit		
Unit 2 Piecewise-defined Functions to Model & Solve Problems		Unit 6 Trigonometric Functions: Sine & Cosine to Model & Solve Problems Note: (Study Only Sine& Cosine)	Unit 8 Theoretical & Experimental Probability
2.02 a Using Tables, Graphs, & Algebraic Properties	Unit 5 Univariate Data: Summarize & Analyze to Solve Problems	2.04 a Using Tables, Graphs, & Algebraic Properties	1.03 a Addition & Multiplication Principles
2.02 b Interpret the Constants, Coefficients, and Bases	1.02 a Methods of Data Collection	2.04 b Transformations with Respect to Period, Amplitude, and Vertical & Horizontal Shifts	1.03 b Permutations & Combinations
	1.02 b Statistical Principles & Methods in Sample Surveys	2.04 c The Law of Sines & The Law of Cosines	1.03 c Simulations for Probability Models

Unit 3 Power Functions to Model & Solve Problems	1.02 c Measures of Central Tendency & Spread		1.03 d Expected Values & Fairness
2.03 a Using Tables, Graphs, & Algebraic Properties	1.02 d Normal Distribution Curve	Unit 7 Recursively- defined Functions to Model & Solve Problems	1.03 e Discrete Random Variables
2.03 b Interpret the Constants, Coefficients, and Bases	1.02 e Graphical Displays of Data	2.05 a Sum of a Finite Sequence	1.03 f The Binomial Theorem
	1.02 f Compare Distributions	2.05 b Sum of an Infinite Sequence	

Competency Goal 1: The learner will analyze data and apply probability concepts to solve problems.

Competency Goal 2: The learner will use functions to solve problems.

Essential Questions should be incorporated into daily math activities in order to engage students in real life problem solving.
