Deshaun Snow Receives EDF Renewables Scholarship

Deshaun Snow Receives EDF Renewables Scholarship

Deshaun Snow is the proud recipient of the EDF Renewables scholarship after attending a career fair hosted by the Center for Energy Education.

Amanda Mack, EDF Project Development Manager, states that the purpose of the EDF scholarship is “To introduce and educate students about the renewables/clean energy industry and opportunities outside of

traditional career paths. We appreciate and acknowledge there are many choices in front of them and would like to present new alternatives for those seeking careers in an environmentally sustainable future.”

Deshaun graduated from Northwest Collegiate and Technical Academy, and his plans entail becoming an entrepreneur. Superintendent Dr. Cunningham states, “I am proud of Deshaun for being open to new career opportunities. Continue to *Strive for Five.*” Each student submitted an essay at the EDF Renewables booth during the Clean Energy Fair. Candidates were selected based on their essays.

Deshaun Snow received a \$1,500 scholarship. Other recipients include Gabriel Roberts of Roanoke Rapids Early College who received a \$1,000 scholarship and Ladajah Joyner of Bertie Early College who received a \$500 scholarship.
