15

Corridor walls - classrooms

25

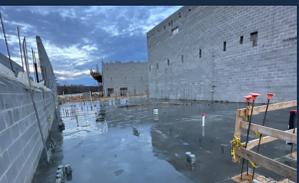

Bar joist delivery (Area D - Gym)

26

Slab prep - corridor walls (A & B)

27

Area D concrete slab pour

## SAFETY IS OUR TOP PRIORITY

This steel beam, reserved for the "Topping Out" ceremony, is available for signing at the County Office.

It is time to begin steel installation! With any changing phase of construction, it is especially important to keep safety top of mind. Each week, the entire project team gathers to discuss that week's Safety Audit, Personal Protective Equipment, and potential jobsite hazards.

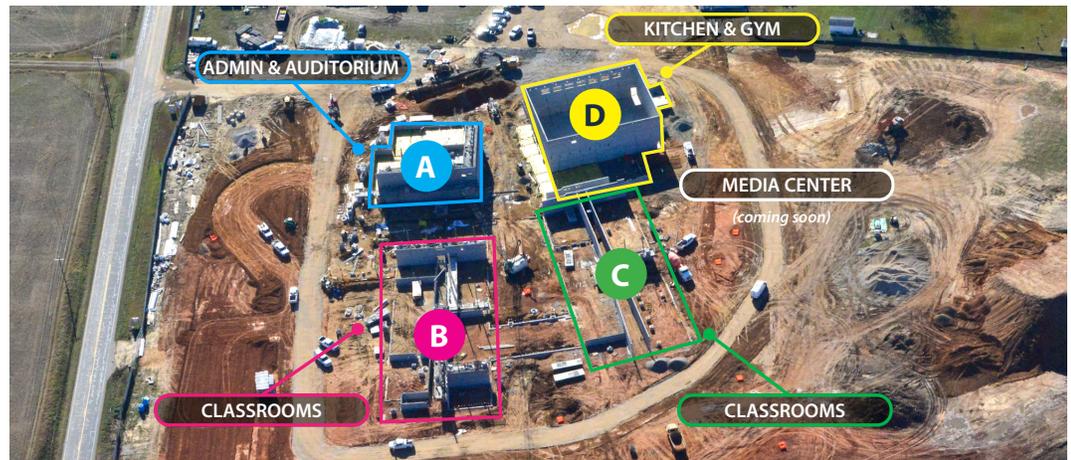

Subcontractors on the Eastman job site gather for their weekly safety meeting.

Namue Quemelen, Assistant Superintendent, reports on the weekly safety audit.
